

Replacement Spaform SF50 PCB circuit board

SF50
S/N 52078***

Product Description

Spaform **SF50 PCB** – This is a genuine Spaform PCB, made by Balboa and is a direct replacement for any existing SF50 board, this must only be fitted to Spaform Spas where an existing failed **SF50** control board (PCB) is found

Although other generic PCBs made by Balboa are available and will fit as a replacement for the **SF50** we must advise against it, they are never as straight forward and as easy to set up as you think, Spaform PCBs have their own special programming and as a result no other generic PCB board works as well and can be problematic. Our advice is to **only fit a direct replacement for the board you have already.**

Useful Info

How to identify your Spaform PCB,

On every Balboa / Spaform PCB control board is a white sticker with a barcode on, above the barcode is a S/N number, for this board it will be **52078*****xxxxxxxxx & below the barcode will read BOARD **SF50** SPAFORM LT LDR CE

The size of PCB is also a useful quick way to double check. The **SF50** PCB measures **170mm x 90 mm**

PCB = Printed Circuit Board

Specifications – SF50 PCB

Article No. = 52078

Model = Lite Leader (Spaform licensed SF50)

No. of Pump Connections = 1

Blower Connection = Yes

Light Connection = 12V Only

Sensor Type = Pressure Switch

Size Inc Tabs = 170mm x 89mm

Manufacturer = Balboa

Volts/Hz = 230v 50hz

Pump 1 = 2 speed

Heater Connection = Yes

Ozone Connection = Yes

Main Buss Fuse = 20 Amp

Compatible with Balboa Lite Leader and Spaform licensed SF50 touch pads

Important Note

This type of product must be installed by a competent / qualified person, and if installed incorrectly can be easily damaged.

This board must not be fitted to any other make of hot tub or spa and only used as a direct replacement for existing Spaform/Balboa **SF50** PCB board.
