

Advanced Plasma Gap (APG) Technology
UNIVERSAL VOLTAGE

DEL ozone™
natural spa sanitation

ULTIMATE IN SANITATION

RELIABILITY

Unsurpassed Life Expectancy

PERFORMANCE

*High Ozone Output and
Universal Voltage*

BEST VALUE

High Quality, Low Cost

** Actual Size*

The ultimate in water purification technology, the APG-U ozone generator matches the capabilities of our own High Output CD units at a fraction of the size. And the newly engineered design is now equipped with Universal Voltage. It's the reliability, performance and technological advancement you can only expect from DEL Ozone.

Advanced Plasma Gap (APG) Technology UNIVERSAL VOLTAGE

PERFORMANCE VALIDATION

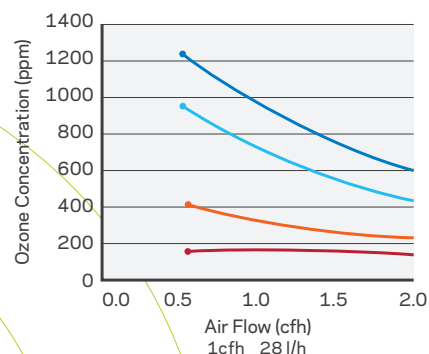

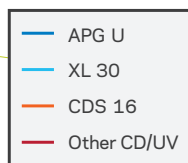

Higher ozone output and longer life than other CD technology, the DEL Ozone AGP U is the ultimate solution for water treatment in spa and jetted tub applications. Considerably more energy efficient than UV ozone generators, the APG U is lower in overall power consumption, heat generation and operating cost.

DEL Ozone systems have been third party validated to kill up to 99.99% of microorganisms typically found in spas. Ozone sanitizes the water quickly and effectively without the undesirable by products created by traditional chlorine and bromine chemicals.

PERFORMANCE FEATURES

- > Water Back Flow Resistant
- > EMI Export Compatible
- > Universal Voltage
- > 100 250V / 50 60Hz
- > Consistent Ozone Output
- > Ozone LED Indicator Light
- > Reduced Nitric Acid By Product
- > Utilizes Ozone Resistant Materials

SPECIFICATIONS & OZONE OUTPUT

MODEL	APG-U
DIMENSIONS	125mm W x 86mm H x 58mm D
OZONE OUTPUT	50-70 mg/hr
VOLTAGE	100-250V; 50/60 Hz
POWER	10 Watts
ENCLOSURE	Molded ABS
WARRANTY	Standard - 2 Years

Measurements at Standard Temperature and Humidity

IPX5/TUV
