## AquaFinesse POOL starter guide & weekly maintenance

AquaFinesse POOL is only intended for use in swimming pools and must be used in combination with chlorine, bromine or other oxidiser. These instructions are applicable if your pool water is in reasonable condition before beginning treatment.

1. Ensure that the pool floor is vacuumed and the filter backwashed/rinsed regularly, as set out in the manufacturer's instructions.
2. Following a backwash, you may need to top up the pool with fresh water to once again reach the correct levels.
3. Using protective gloves, place a chlorine tablet in the skimmer basket. Read the instructions on the packet (Please follow your countries guidelines regarding chlorine usage).
4. Regularly check the chlorine tablet, replace before the old one has completely dissolved.
5. Calculate the amount of water in the swimming pool using the calculation guide below\*.
6. Using the floating dispenser, add the correct amount of AquaFinesse POOL tablets according to the volume of water.
7. AquaFinesse POOL does not contain any anti-algae agents. However, the chlorine tablet should be sufficient to maintain an algae free pool.

### \*Calculation guide:

If a pool is 7 metres long, 3.5 metres wide and on average 1.5 metres deep. The capacity is then:  $7 \times 3.5 \times 1.5 = 36.75 \text{ m}^3 = 36,750 \text{ litres}$ .  
Rounded up, 40,000 litres.

Each AquaFinesse POOL tablet is sufficient for 1 week's treatment of 20,000 litres of water. **A double dose** of AquaFinesse POOL should be used during the **first 2 weeks**.

In the case given in the calculation guide: 4 AquaFinesse POOL tablets should be used in the skimmer's basket or in the floating dispenser during the first two weeks, followed by 2 AquaFinesse POOL tablets in subsequent weeks.

### Schematic presentation of the calculation guide (a pool of 40,000 litres)

	AquaFinesse POOL	Chlorine tablet 200 gram
Week 1 en 2	2 tablets in the skimmer and 2 tablets in the floating dispenser, evenly timed over the week (on Monday and Thursday for example).	1 chlorine tablet in the skimmer.  Regularly check and add a new tablet as required.
Week 3, 4, 5...	2 tablets in the floating dispenser/ skimmer, evenly timed over the week.	Regularly check and add a new tablet as required.

The logo for AquaFinesse POOL features the word "POOL" in a large, white, rounded font with a thick blue outline. Above the letter 'O', there are three small white circles of varying sizes, resembling bubbles or water droplets.
