

Replacement Spaform SF172 PCB circuit board

SF172PCB
S/N 52612

Product Description

Spaform **SF172** PCB – This is a genuine Spaform PCB, made by Balboa and is a direct replacement for any existing SF172 circuit board, this must only be fitted to Spaform Spas where an existing failed **SF172** control board (PCB) is found

Although other generic PCBs made by Balboa are available and will fit as a replacement for the **SF172** we must advise against it, they are never as straight forward and as easy to set up as you think, Spaform PCBs have their own special programming and as a result no other generic PCB board works as well and can be problematic. Our advice is to **only fit a direct replacement for the board you have already.**

Useful Info

How to identify your Spaform PCB,

On every Balboa / Spaform PCB control board is a white sticker with a barcode on, above the barcode is a S/N number, for this board it will be **52612** below the barcode will read BOARD SPAFORM **SF172**

The size of PCB is also a useful quick way to double check. The **SF172** PCB measures **250mm x 150mm**

PCB = Printed Circuit Board

Specifications – SF172

Article No. = **52612**

Model = **Value Duplex M7 (Spaform licensed SF172)**

No. of Pump Connections = **1**

Blower Connection = **Yes**

Light Connection = **12V Only**

Sensor Type = **Dual M7 sensors**

Size Inc Tabs = **250mm x 150mm**

Manufacturer = **Balboa**

Volts/Hz = **230v 50Hz**

Pump 1 = **2 Speed**

Heater Connection = **Yes**

Ozone Connection = **Yes**

Main Buss Fuse = **25 Amp x 2**

Compatible with Spaform SF172 control system & touch pads only

Important Note

This type of product must be installed by a competent / qualified person, and if installed incorrectly can be easily damaged and invalidate the warranty!

This board must not be fitted to any other make of hot tub or spa and only used as a direct replacement for existing Spaform/Balboa **SF172** PCB board.
