

going strongly against the flow
pumps for small to swim spas

New Circ-Masters CMXP & CMHP CE

Smart design, cool runnings
and the highest GPM of any recirculation pump in the spa industry.

New Aqua-Flo by Gecko's CMXP and CMHP pump takes 24-hour filtration to a new level, delivering the highest GPM of any recirculation pump in the spa industry.

Higher GPM allows the new Circ-Masters to operate a high-flow heating system resulting in increased heating efficiency and up to four times the filtration.

Increased filtration efficiency:

- higher flow rate for quicker more efficient filtration
- optimized water circulation
- more filtration at a lesser cost

Greater flow to heater:

- maximized heater efficiency
- extended heater lifetime
- better heater protection

Smart and compact design:

- designed for continuous duty operation
- carbon-graphite self-lubricating seal
- UniverSeal
- built-in external fan
- sealed motor IPx5
- quick release compression fittings
- 230V 50 Hz, 48 frame motor
- quiet operation
- side discharge
- CMXP: 2" inch inlet & outlet
- CMHP: 1 1/2" inch inlet & outlet
- high volume volute
- multiple drain location
- 8 feet cord with AMP connector
